

ECO₂ Smart Schools Climate Conference 2023

Use the 2023 UN Climate Change Conference (COP28) to inspire and educate your students about climate change, its links to energy use past, present, and future, and the role of clean energy in resolving the climate crisis. Sign up to our FREE education pack and online climate conference and work with schools around the world to help combat Climate Change.

ECO₂ Smart Schools Climate Conference Education Materials:

All lessons age differentiated, with an Arabic translation available.

Lesson 1 – Climate Change and Past Energy Use – 1 hour – Ages 7-9 / 9-11 / 11+

- Will introduce the idea of climate, climate change, and the climate crisis, and will explain how energy use has changed through history and how past and current energy use is causing the climate crisis.

Lesson 2 – Clean Energy Today – 1 hour – Ages 7-9 / 9-11 / 11+

- Will explain how energy is being produced and used today, with a focus on the opportunities and challenges of clean energy generation.

Lesson 3 – Clean Energy in the Future – 1 hour – Ages 7-9 / 9-11 / 11+

- Will explore the future potential for clean energy generation and storage in resolving the climate crisis and providing sustainable careers.

Lessons include activities that encourage inter-school sharing through our interactive platform, which will facilitate inter-school, global sharing of ideas, knowledge and experiences.

Live ECO₂ Smart Schools COP28 Online Climate Conference:

Date TBC (likely w/c 4th December 2023)

- Your students will interact live with a panel of climate experts, including delegates at COP in Dubai.
- Opportunity to share questions and work with international network.
- Opportunity for students to share their own climate pledges.

Register your school [here](#) as soon as possible:
